-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

The application has been withdrawn from issue to permit reopening of prosecution, due to newly discovered prior art, and is hereby presented. Applicant's arguments with respect to claims 7-14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 7, 8, and 15** are rejected under 35 U.S.C. 102(b) as being anticipated by **Blackburn et al (5,092,313)**. **Blackburn et al** discloses a system (gas log fireplace) for exhausting smoke from a space having an upper boundary wherein the smoke accumulates therein and includes an opening/openings (62, 244) through the upper boundary to exhaust smoke from the space, at least one make-up air shaft (70) communicating through the upper boundary to below the smoke (SEE Figure 3).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claim 9** is rejected under 35 U.S.C. 103(a) as being unpatentable over **Blackburn et al (5,092,313)**. **Blackburn et al** discloses the applicants primary inventive concept as stated above but does not specifically recite the make-up air shaft (70) having a plurality of make-up air shafts. It would have been an obvious matter of design choice to modify the make-up air shaft by increasing the quantity for increasing the amount of air flow, since such a modification would have involved a mere variation of the component, a change of which is generally recognized as being within the level of ordinary skill in the art.

***Allowable Subject Matter***

**Claims 1-6 and 14** are allowed.

**Claims 10-13 and 16-19** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
